International Education

IN COLLABORATION WITH THE COMENIUS 3 THEMATIC NETWORKS

**Denmark – Helsingør
March 9th – 13th 2011
Programme**

How to read this programme?

ESP conferences are working conferences. At the end participants should have achieved something to take back home and to school: preferably an idea, outline, scenario or plan to actually implement with one's students in collaboration with one or more colleague-teachers and their pupils in another country.

The conference can be seen as a design process: we start with basic information about how to plan and run a computer supported collaborative learning project, then inspiration and at last we go on to design and planning sessions. Finally we publish the projects on the web what we have decided together.

This process means that we can only offer a rough guideline on what is actually going to happen. Please envisage yourself as an active participant able to contribute to the programme yourself!

This ESP working conference is about inter -and multidisciplinary projects in which ICT-based collaboration is a central issue, both within and between schools. The programme is addressed to teachers of subject areas like modern foreign languages, science and social sciences, teaching at different schools like primary, lower and upper secondary, vocational and special needs. In addition head teachers, other educators and researchers are invited to join us in Denmark/Helsingør.

This year we present a special programme for the head teachers who play a very important role in International Collaboration at their schools.

We are convinced that you can successfully apply the knowledge acquired at the conference in your everyday teaching and other practices.

Come and enjoy yourselves!
